# Training TR-102 Report <u>Day 8</u>

#### 21st June, 2024

The eighth day of the TR-102 training continued with advanced web tools, focusing on Google Analytics, axeDevTool, the W3C Validator, Wappalyzer, and creating RDF graphs using Turtle syntax.

# **Web Tools**

### Google Analytics

- The session introduced Google Analytics, a powerful tool for tracking and analyzing web traffic.
- Participants learned how to set up Google Analytics for their websites
- Analyzed traffic data to gain insights into user behavior, interpret the data, and improve site performance.

#### axeDevTool

- Participants were introduced to axeDevTool, a browser extension for accessibility testing.
- Used axeDevTool to identify accessibility issues and ensure web content meets accessibility standards.

W3C Validator

• The session covered the use of the W3C Validator to check the markup validity of web

documents in HTML, XHTML, SMIL, etc.

• Validated web pages to ensure they adhere to W3C standards, improving compatibility

and performance.

Wappalyzer

• Participants explored Wappalyzer, a tool that uncovers the technologies used on websites.

• Analyzed various websites to identify the technologies and frameworks used, helping in

understanding the tech stack behind web projects.

**Creating RDF Graphs** 

Created RDF graphs using Turtle syntax, applying concepts learned during the session.

**Key Takeaways** 

• Google Analytics: Mastered setting up and using Google Analytics to track and analyze web

traffic.

• axeDevTool: Gained practical skills in using axeDevTool for accessibility testing.

• W3C Validator: Understood the importance of validating web documents against W3C

standards.

• Wappalyzer: Learned to identify web technologies used in various websites.

Submitted By: Jasvir Kaur URN: 2203474 Page No.: 2

• **RDF Graphs:** Enhanced skills in creating RDF graphs using Turtle syntax for structured data representation.

## **Conclusion**

Day 8 of the TR-102 training equipped participants with advanced tools and techniques for web development. The session emphasized the importance of data analysis, accessibility, and validation in creating robust and user-friendly web applications. Participants are now better prepared to optimize their web projects using data-driven insights and industry standards.
